

## **Volunteer Medical Transportation Program (VMTP)**

- The VMTP is for those individuals who require transportation to medical appointments outside of Revelstoke.
- The program does not take the place of or interfere with existing services, but is intended to enhance services in the community. Clients are expected to use the local transit, taxi passes, Handy Dart and, the Medical Bus before requesting service.
- The program is not just for seniors or members but is open to anyone in the community.
- Participants must be able to get in and out of a vehicle without assistance and be willing to share rides if necessary to accommodate others.
- As phone lines are not manned 7 days a week, a 5-7-day advance notice is required to book or cancel a ride.
- Because we rely on volunteers we cannot guarantee a driver for every request.
- Costs for drives are based on the client's annual household income.
- Drivers will have no specialized training and will only be responsible for driving and escorting clients to their appointments.
